## Welcome to the CDM Rulebook

### Current to EB 58 - Latest Developments

- The EB suspended the methodology AM001 with immediate effect while the Meth Panel conducts another review of the methodology. Methodology AM001 is applicable to project activities that destroy HFC-23 generated during the production of the refrigerant HFC-22. The EB is concerned that this type of project activity can create incentives for project developers to increase baseline emissions through increases in the production of HFC-22. The Executive Summary of the Meth Panel's Report on HFC-23 issues can be accessed [here](#).
- The EB adopted version 1 of the Procedure on performance monitoring of designated operational entities. A summary of the Procedure can be accessed [here](#).

### About the CDM Rulebook

The CDM Rulebook is the definitive online database of the CDM rules. It has been developed by Baker & McKenzie, with funding from eight donor organisations, and is now freely available to the public.

We recommend that users new to the CDM begin with the [annotated Article 12 section](#) or the [Overview of the CDM](#). More experienced users can navigate directly to the relevant section, using the flowchart to the right, the tabs above, or the search function.

The site is updated after each Executive Board meeting and meetings of the COP/MOP. The overall currency of the site is indicated by the reference to the relevant Executive Board meeting as specified in the far right of the top menu bar ("Current to EBXX").

Please note that there are **no hard copy versions** of the CDM Rulebook and

## Welcome to the UNEP Risoe CDM/JI Pipeline Analysis and Database

The CDM/JI Pipeline Analysis and Database contains all CDM/JI projects that have been sent for validation/determination. It also contains the baseline & monitoring methodologies, a list of DOEs and several analyses. Almost all information is from [cdm.unfccc.int](http://cdm.unfccc.int) and [ji.unfccc.int](http://ji.unfccc.int).

This monthly newsletter shows a sample of the analysis in the Pipeline. If you want more information, then look into the left column and click on the links to sub-pages or click on the download for the full Pipeline, which contain tables with a line of key information for all CDM and JI projects. You can also download a rather old guidance document to the Pipeline.

We publish regularly analysis in the "CDM/JI Analysis" section on [www.carbon-financeonline.com](http://www.carbon-financeonline.com) (access to this section is free of charge).

» Go to overview page

Please cite as "UNEP Risoe CDM/JI Pipeline Analysis and Database, January 1st 2011".

Please do not put the spreadsheets on other web-sites, you may only put a link to them on this site.

## CDM news:

In December 120 new CDM projects entered the Pipeline like the maximum number over the last two years.

The issuance of CERs in December was again very high: 21.6 MCERs. The total issuance is now back on our exponential

# UNEP Risoe's Methodology Selection Tool

Tool for Selecting CDM Methodologies & Technologies

Search this site

Home Forums Links About Contact Introduction

## Welcome to CDM Methodologies & Technologies

The CDM Methodologies & Technologies Selection Tool provides:

- Easy access to a complete overview of all methodology options based on the specific project characteristics – use the Methodology Selection Tool on the right
- Easy access to general economic sector overviews, the relevant technologies applied in a given sector for emissions reduction – and statistics on CDM projects in the sector – use the technology selection tool on the right
- A **discussion forum** that allows practitioners' exchange of experience on the practical application of methodologies for specific technologies – go to forums in the banner above or go to the dedicated forums directly from the methodology search results

The site is updated with the latest statistics on a monthly basis using the UNEP/Risoe CDM Pipeline (see the link to the left), thus ensuring that all methodological developments are recorded and presented. We invite you to explore the site and welcome any feedback on the tool.

## Methodology updates - January 2011

### New methodologies:

One new A/R methodology has been approved:

- AR-AM12: " Afforestation or reforestation of degraded or abandoned agricultural lands"

## Methodology Selection Tool

Go directly to specific methodologies:

- + Agriculture and Forests
- + Waste
- + Conventional Power Production
- + Heating Systems
- + Renewable Energy
- + Power Consumption
- + Industrial Production Processes
- + Transportation

## Technology Selection Tool

Choose sector to see full site content:

- ▶ Agriculture and Forests
- ▶ Waste
- ▶ Conventional Power Production
- ▶ Heating Systems
- ▶ Renewable Energy
